

Company Overview

AKG is one of the leading developers of infrastructure planning software. Our solution VESTRA is the standard design software used by many government agencies and engineering consultants. We bring more than 25 years of dedication to roadway design and have supported some of the world's most sophisticated and efficient road design challenges. From disaster-recovery roadbuilding in Asia for the World Bank or design of the German Autobahn System to planning of several Formula One race tracks (e.g. Bahrain, Shanghai, Istanbul).

Company Principles

As a software development company, we are governed by certain principles that define who we are and how we work. They have been, and continue to be, important guidelines for our success.

■ Innovation

We are a technological trailblazer for the market of civil engineering software. Repeatedly, we have developed exemplary software systems and applications which have become a benchmark. We provide solutions that enable all customers to become even more competitive.

■ Top quality

We create comprehensive software, recognizing the need for effective and confident solutions. We offer top quality and strive for perfection in all business areas.

■ Fairness

We are an independent, private company. We co-operate with our customers in true partnership and fairness, aiming for mutual success. We communicate with openness and trust.
